

Matthew D. Krakowsky

B.S. in Biological Sciences, Cornell University,
M.S. in Plant Breeding and Genetics, Texas A+M University
Ph. D. in Plant Breeding, Iowa State University

Dr Krakowsky spent a year and a half as a post-doc at CIMMYT in Mexico before starting his career with the USDA-ARS in 2003 in Tifton, GA where his research focused on reducing aflatoxin contamination in maize. He joined the Germplasm Enhancement of Maize (GEM) project in 2007 as the coordinator for the project in Raleigh. His focus in his current position is on identification and introgression of exotic germplasm into temperate-adapted maize.
